## Skills

- **Message Broker:** RabbitMQ
- **Languages:** Java, TypeScript, C#
- **Cloud:** Azure
- **Web Development:** Angular
- **Databases:** SQLite, MongoDB, Postgres
- **Frameworks:** Entity framework, Spring Boot, Hibernate/JPA
- **Devops:** Jenkins, Azure Devops
- **Version Control:** Bitbucket, Git, Github

## Summary

As a Full Cycle Developer with over five years of experience, I am driven by a deep passion for understanding and integrating every stage of the software development lifecycle. I have a strong track record of developing and deploying robust applications with a focus on code quality, scalability, and efficiency. My experience includes the successful integration of OpenAI to optimize workflows and the implementation of microservices to enhance system scalability and service idempotency. I contributed to the development, focusing on feature development with high test coverage, continuous integration, and comprehensive documentation. I actively participate in Scrum ceremonies and mentor junior developers, fostering a collaborative and productive team environment.

## Experience

### BEES

Senior Software Engineer

Jun 2024 - Present

- Successfully integrated the system with OpenAI to optimize order creation workflows.
- Implemented microservices to enhance system scalability and service idempotency.
- **Context:** As a Software Engineer at BEES, my job is multifaceted and dynamic, encompassing the entire software development lifecycle. Responsibilities include developing new functionalities with high efficiency and accuracy, conducting thorough code reviews for team members, and resolving bugs reported by QA engineers with an average resolution time of one day.

### Wipro

Software Engineer

Mar 2022 - Jun 2024

- **Context:** Developing Mastercard's Identity Solution, an application that helps entities authenticate and validate customers' digital identity. Main activities include feature and story refinements with product owners, feature development with at least 90% coverage, and mentoring junior developers.

### SiDi

Software Developer

Apr 2021 - Mar 2022

- **Context:** Working with Kanban methodology, developing tools for other developers to work on the Samsung desktop environment using technologies like Java, C++, C#, SQLite, and Entity Framework on an Onion architecture.

### Avanade

Software Engineer

Jun 2020 - Apr 2021

- **Context:** Developed APIs to help the company modernize its old Insure broker application from a Cobol-based application. Participated in new feature development to inform clients which plan suits them best.

### MV

Junior Software Developer

Oct 2019 - Jun 2020

- **Context:** Worked in the system integration team providing support for current software written in PL/SQL and developing a new API in Spring Boot for software integration.

### Procenge

Software Engineer Intern

Aug 2018 - Oct 2019

- **Context:** Worked as a Front-end software developer intern, participating in all Scrum ceremonies to help the team evaluate and develop the product.

### Valorian

Full Stack Engineer

Sep 2018 - May 2019

- **Context:** Worked on dashboard creation, delivering both in back-end and front-end to help teams focus on delivering value.

Education

<b>FC Tech</b> <i>Software Architecture</i>	Master of Business Administration - MBA May 2023 - Nov 2024
<b>Universidade Católica de Pernambuco</b> <i>Computer Software Engineering</i>	University extension program Dec 2017 - Dec 2018
<b>Universidade Católica de Pernambuco</b> <i>Computer Science</i>	Bachelor's degree Dec 2015 - Dec 2019
<b>SAGA - School of Art, Games and Animation</b> <i>Graphic Design</i>	Tecnology Dec 2009 - Dec 2012
<b>Strathmore High School</b> <i>High School Certificate of Competence Program</i>	High School Dec 2011 - Dec 2012
